

# Changes to number plates with the new E standard

### **Border**

A printed border is optional, and can be up to 5mm wide.

### **Font**

Only solid black characters are permitted. Carbon, Hi Line and 3D are no longer permitted.

## Reflective

Reflective material must be plain with no water marks or logos and must meet photometric requirements.

# **Flags**

All flags must be integrated with the reflective material. They can't be overprinted or stuck on.

# BAI9 AAA

# BSAU mark

Number plates must have the new British Standard mark, BS AU 145e.

HILLS bsau145e

# www.hillsnumberplates.com

# **Screws not recommended**

Screws are not recommended as they can compromise the durability of the plate. You can use our secure sticky pads.

# **Customer name and postcode**

Maximum height for customers' registered name and post code is 10mm and minimum is 3mm.

# Readable area

The readable area of the plate must be clear and nothing can be printed within 10mm of the characters. The registered company name and postcode must be at least 7mm away from the characters.
